

Econopolis Sustainable Equities Fund

Description of funds

Econopolis Sustainable Equities is a compartment of Econopolis Funds SICAV, a Luxembourg UCITS fund. The fund aims to deliver a long term return to investors via investments in equity and monetary instruments, without geographical restriction and without restrictions concerning sector or currency allocation. Econopolis Sustainable Equities is aimed at investors with an investor horizon of more than 5 year

Comments of portfolio manager

Dit compartiment sloot de maand 1.67% hoger af. De Stoxx Europe 600 won 2.3%, terwijl de S&P 500 6.5% won in dollar en 3.7% in euro. Technologiebeurs Nasdaq sloot op zijn beurt 6.5% hoger af in dollar (3.8% in euro). Europa verhoogde de ECB de rente verder, terwijl de Amerikaanse centrale bank een rentepauze installeerde. Binnen het compartiment positioneerden de beheerders de portefeuille iets defensiever door de posities in wat meer conjunctuurgevoelige bedrijven als ABB (elektrificatie en automatisering), Metso (mijnbouwapparatuur) en Saint-Gobain (glas en bouwmaterialen) wat af te bouwen. Daarnaast werd een eerste positie genomen in supermarktenbedrijf AholdDelhaize. Dit bedrijf staat vooral sterk in in het Oosten van de VS en de Benelux. De activiteiten van het bedrijf zijn behoorlijk defensief – mensen moeten altijd eten – en AholdDelhaize kan bogen op een uitstekend track record. Op lange termijn verwachten we dat de Amerikaanse activiteiten van het bedrijf afgesplitst worden omdat er geen noemenswaardige synergieën zijn met de Europese tak van het bedrijf. Daarnaast kochten de beheerders aandelen bij van sportkledingfabrikant Shenzhou International, Assa Abloy (toegangscontrole) en Emerson Electric (automatisering). De positie in softwarebedrijf Salesforce werd verkocht na de sterke koersontwikkeling dit jaar. ThermoFisher was een nieuwkomer binnen het compartiment. Dit bedrijf is een wereldleider in analytische instrumenten en laboratoriumapparatuur. Circa 80% van de inkomsten van het bedrijf zijn weinig conjunctuurgevoelig (o.a. dagdagelijkse verbruiksartikelen zoals reagentia). Het bedrijf is erg rendabel en kan bogen op een gezonde balans.

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 4 out of 7, which is an average risk class. This classifies potential losses due to future performance at an average level, and poor market conditions may affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you receive depends on the exchange rate between the two currencies. This risk is not taken into account in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance, so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Investment objectives

The objective of the sub-fund is to provide investors, through an actively managed portfolio, with a long-term capital gain on their investment. This objective will be pursued by investing the sub-fund's assets primarily in equities and other stocks, with no geographical limitation. The sub-fund must hold at least 90% of its net assets in equities. The sub-fund will invest mainly in equities and other securities with diversification across sectors and regions. The sub-fund will invest in equities and other securities of companies operating in developed markets (such as, but not limited to Europe, the United States and Japan) and may also invest in companies operating in emerging markets. The sub-fund's investment policy is based on three cornerstones in stock selection securities selection: a disciplined multi-step approach in the Investment Manager's research and analysis, a unique non-benchmarked philosophy and the importance of on-site research. Investments are based on conviction rather than benchmarks: conviction in themes, conviction in countries and conviction in companies. Subject to legal restrictions, the sub-fund may invest in derivative financial products, such as futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, to achieve its investment objectives and to hedge risks. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.
