Monthly Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product or relevant Benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Data is provided in EUR

Date	Periods	Favourable Scenario		Moderate Scenario		Unfavourable Scenario		Stressed Scenario	
		What you might get back after costs	Average return each year (in %)	What you might get back after costs	Average return each year (in %)	What you might get back after costs	Average return each year (in %)	What you might get back after costs	Average return each year (in %)
	1	16060	60.60%	11570	15.70%	6340	-36.60%	3410	-65.90%
