

# Econopolis Climate Fund

## Description of the funds

Econopolis Climate Fund s is a compartment of Econopolis Funds SICAV, a Luxembourg UCITS funds. The fund aims to deliver a long term return to investors via investments in equity instruments that deliver climate solutions. Econopolis Climate Fund is aimed at investors with an investor horizon of more than 5 years.

## Manager's comment

The compartment closed the month of January with a negative return of 5.28%. The HVAC industry is a high-growth market benefiting from the shift towards sustainable solutions to combat climate change and reduce greenhouse gas emissions. Two of the key trends in the industry are the increasing use of eco-friendly refrigerants and the growing popularity of more energy-efficient heat pumps. The recent energy crisis and rising regulatory pressure have only reinforced these trends. During the month of December, Trane Technologies Autodesk and Republic Services were the biggest contributors to returns. EDP Renovais, Samsung SDI and Xinyi Glass weighed the most on returns in January. Assets under management amounted to €107.6 million. At month-end, the breakdown across climate clusters was as follows: renewable energy (32.2%), sustainable transport (15.7%), energy-efficient infrastructure (24%), circular economy (15.1%), emissions capture (7.8%) and sustainable agriculture and food (5.2%).

## Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 4 out of 7, which is an average risk class. This classifies potential losses due to future performance at an average level, and poor market conditions may affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you receive depends on the exchange rate between the two currencies. This risk is not taken into account in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance, so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

# Econopolis Climate Fund

**Investment objectives:**

The sub-fund's objective is to offer investors, through an actively managed portfolio, long-term capital gains on their investment. The sub-fund must hold at least 90% of its net assets in equities. The sub-fund will invest in equities and other equity instruments of companies operating in developed markets (such as, but not limited to Europe, the United States and Japan) and may also invest in companies operating in emerging markets. The universe of the sub-fund has been constructed with a view to selecting companies whose business model is focused on providing solutions or parts of solutions, or which have adapted their business model to meet increasing climate change challenges. There are no restrictions or limitations in terms of currencies or geographical regions. The Investment Manager's choices are discretionary and reflect its expectations and strategic views. Investment selection is based on ongoing financial evaluations, analysis of the macroeconomic environment and the specific profile of the issuer, future developments, etc. The sub-fund's investment policy is based on three cornerstones in stock selection: a disciplined multi-step approach in the Investment Manager's research and analysis, a unique non-marketed philosophy and the importance of on-site research. Investments are based on conviction rather than benchmarks: conviction in themes, conviction in countries and conviction in companies. The sub-fund may invest in derivative financial products, such as futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, to achieve its investment objectives and to hedge risks. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Investors can obtain a summary of investor rights (available in Dutch, French and English) on this webpage: <https://www.econopolis.be/nl/regulatory-information/>
