Gino Delaere

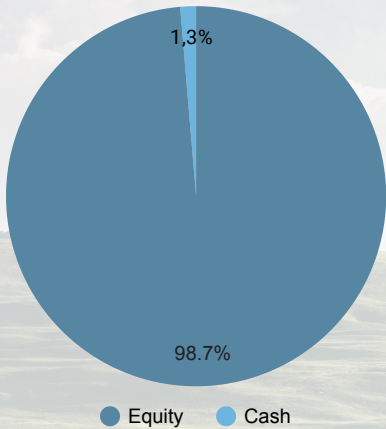

Description of the funds

Econopolis Climate Fund s is a compartment of Econopolis Funds SICAV, a Luxembourg UCITS funds. The fund aims to deliver a long term return to investors via investments in equity instruments that deliver climate solutions. Econopolis Climate Fund is aimed at investors with an investor horizon of more than 5 years. SFDR classification: Article 8 Fund.

Manager's comment

In July, global financial markets showed positive developments. Worldwide indices rose, supported by favourable macroeconomic data, strong second-quarter corporate results and progress on trade agreements, as well as the One Big Beautiful Bill Act. US stocks led the way in this regard, especially within the technology sector and cyclical stocks. Rising interest rates and tensions between Trump and Powell caused some volatility. Quite a few companies within the portfolio have already delivered great results. Strong performance was recorded in commercial HVAC, AI value chain, grid and waste management, while companies with consumer or European exposure showed weaker numbers. Positive surprises came mainly from pricing power, cost control and structural demand for data centres. Quite a few companies confirmed or raised their full-year forecasts, providing confidence for the second half of the year. At the same time, inventory corrections, currency headwinds and cautious consumer behaviour remain areas of concern. Share prices, in many cases, did not reflect these great results. The compartment closed the month of July with a positive 1,89% return. As a result, the yield since the start of the year stands at 2.86%. During July, managers continued to build positions in the two Japanese companies Ebara and Hitachi. In contrast, companies such as: Saint-Gobain, Air Liquide, Spie, Republic Services, Johnson Control and Linde were wound down. During the month of July, Delta Electronics, Synopsys and Cadence were the biggest contributors to returns. Shimano, WEG and SIKA weighed most heavily on returns in July. Assets under management amounted to EUR 98.7 million. By month-end, the breakdown across the different climate clusters was as follows: renewable energy (36%), sustainable transport (means and systems of transport that are environmentally friendly and energy efficient) (7.7%), energy-efficient infrastructure (31.1%), circular economy (an economic system in which raw materials, products and materials are reused and retain value for as long as possible, with minimal waste and environmental impact) (16.2%), emissions capture (5.4%) and sustainable agriculture and food (agricultural practices and food production that are environmentally friendly, economically viable and socially responsible) (3.4%).

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 4 out of 7, which is an average risk class. This classifies potential losses due to future performance at an average level, and poor market conditions may affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you receive depends on the exchange rate between the two currencies. This risk is not taken into account in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance. so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Econopolis Climate Fund

Investment objectives:

The sub-fund's objective is to offer investors, through an actively managed portfolio, long-term capital gains on their investment. The sub-fund must hold at least 90% of its net assets in equities. The sub-fund will invest in equities and other equity instruments of companies operating in developed markets (such as, but not limited to Europe, the United States and Japan) and may also invest in companies operating in emerging markets. The universe of the sub-fund has been constructed with a view to selecting companies whose business model is focused on providing solutions or parts of solutions, or which have adapted their business model to meet increasing climate change challenges. There are no restrictions or limitations in terms of currencies or geographical regions. The Investment Manager's choices are discretionary and reflect its expectations and strategic views. Investment selection is based on ongoing financial evaluations, analysis of the macroeconomic environment and the specific profile of the issuer, future developments, etc. The sub-fund's investment policy is based on three cornerstones in stock selection: a disciplined multi-step approach in the Investment Manager's research and analysis, a unique non-marketed philosophy and the importance of on-site research. Investments are based on conviction rather than benchmarks: conviction in themes, conviction in countries and conviction in companies. The sub-fund may invest in derivative financial products, such as futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, to achieve its investment objectives and to hedge risks. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Investors can obtain a summary of investor rights (available in Dutch, French and English) on this webpage: <https://www.econopolis.be/nl/regulatory-information/>
