Econopolis Smart Convictions Fund

30/09/2025

Description of the fund

Econopolis Smart Convictions is a compartment of Econopolis Funds SICAV, a UCITS fund under Luxembourg law. The fund aims to deliver a long-term return to investors via investments in other funds, ETF's, equity, bonds and monetary instruments, without geographical restrictions and without restrictions concerning sector or currency allocation. The fund is aimed at investors with an investment horizon of more than 5 years. SFDR classification: Article 8 Fund

Managers' Comments:

September was a strong month for Smart Convictions, delivering a return of +1.88%, with both equities and bonds contributing positively. On the equity side, two main drivers stood out. First, thematic performance from emerging markets and technology remained strong. The solid performance of the technology sector over the past three months almost fully offset the previous underweight position. Key performers included TSMC, Alphabet, and Apple. Conversely, the consumer sector remained challenging – gains in companies such as Inditex and Danone were offset by weaker results in Puig, L'Oréal, and Unilever. The bond sleeve also delivered a positive return of +0.8%, mainly supported by emerging-market and long-term government bonds, as well as by recently acquired corporate issues such as AXA. Proceeds from maturing dollar bonds were reinvested in a seven-year Intel corporate bond with a yield of 4.75%. The managers also sold the Adler real estate bond, further reducing the limited high-yield exposure.

September was an active month overall:

Sold – Brunello Cucinelli, Michelin

Bought – RELX, Atlas Copco, Birkenstock, JCDecaux

Increased – Inditex

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 3 out of 7, which is a medium-low risk class.

This classifies potential losses due to future performance at a medium-low level and poor market conditions are unlikely to affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency different from your reference currency, so the final return you receive will depend on the exchange rate between the two currencies. This risk is not included in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance. so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Econopolis Smart Convictions Fund

Objectives:

This objective is pursued by investing the sub-fund's assets directly or indirectly through mutual funds, including Exchange Traded Funds (ETF), in equities and fixed income instruments, as well as cash or other monetary instruments, without geographical limitation and without sector or currency restrictions. The sub-fund may invest more than 50% of its net assets through mutual funds, including Exchange Traded Funds (ETF). The individual weight of each asset class (equities, fixed income instruments and derivatives, as well as cash or other monetary instruments) may vary from 0 to 100%, depending on economic and market conditions and the manager's expectations and strategic views. The sub-fund may invest up to 50% of its assets in emerging markets instruments (i.e. instruments issued by entities or governments that have their headquarters or place of business or principal listing in emerging markets, defined as constituents of the MSCI Emerging Markets index).

For the purpose of implementing its main investment policy or investing its cash, the sub-fund may also invest up to a total of 49% in treasury bills, deposits, commercial paper and time deposits. Additionally, the sub-fund may hold cash sight deposits up to 20% of its assets. The sub-fund may invest in derivative financial products, including futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, for the purpose of achieving its investment objectives and hedging risk. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark. For the purpose of implementing its principal investment policy or investing its cash, the sub-fund may also invest up to a total of 49% in treasury bills, deposits, commercial paper and time deposits.
