

Econopolis Emerging Markets Equities Fund

Description of funds

Econopolis Emerging Market Equities is a compartment of Econopolis Funds SICAV, a Luxembourg UCITS fund. The compartment aims to deliver a long term return to investors via investments in equity and monetary instruments that have their principal place of business in emerging markets. International companies which have a substantial business exposure to such emerging markets are also eligible for the compartment. SFDR classification: Article 8 Compartment.

Manager's comments:

After a very strong performance earlier this year, the compartment slowed down somewhat in November. Geopolitical tensions eased slightly, but although the earnings season was solid, it was not strong enough to impress the market decisively. The recent meeting between Donald Trump and Xi Jinping resulted in a temporary truce in the trade war. Both nations remain strategic rivals, but each appears to want a period of reduced friction for now. Chinese export controls on rare earth metals were suspended for one year, although given the fragile balance between the US and China, the situation could easily re-escalate. AI-related stocks were responsible for a substantial part of the total return in recent months. Against that backdrop, Alibaba announced that its upcoming AI app will be named Qwen and is intended to become a fully functional AI agent. This illustrates how intense the technological rivalry between the US and China remains. Alibaba's quarterly results were decent, but the lack of forward clarity led to a muted reaction from the market. Tencent, however, reported more convincing results. YumChina and Baidu performed in line with expectations, and Trip.com again delivered clearly better-than-expected results. Sea Ltd disappointed due to weaker forward guidance. Taiwan Semiconductor Manufacturing Company, the world's largest chipmaker and the compartment's largest holding, showed no sign of a slowdown in sales.

Risico-indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 4 out of 7, which is an average risk class. This classifies potential losses due to future performance at an average level, and poor market conditions may affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you receive depends on the exchange rate between the two currencies. This risk is not taken into account in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance. so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Investment objective:

The sub-fund's objective is to provide long-term capital gains to its shareholders. This objective will be pursued by investing the sub-fund's assets primarily in equities of issuers that have their registered office in emerging markets (i.e. countries included in the MSCI Emerging Markets Index) or that carry out a substantial or growing proportion of their business in emerging markets. The sub-fund must hold at least 90% of its net assets in equities. The sub-fund invests mainly in equity positions that are headquartered and/or listed in emerging markets or have significant exposure to such emerging markets or equivalents of equity positions (e.g. P-notes or other similar instruments that provide equity-like exposure to hard-to-access markets) and cash or cash equivalents. There are no restrictions or limitations on currencies, geographical regions or other specific economic or industry sectors or niches.

Subject to legal restrictions, the sub-fund may invest in derivative financial products, such as futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, to achieve its investment objectives and to hedge risks. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark. reference to a benchmark.
