Econopolis Patrimonial Sustainable Fund

Description of the fund

Econopolis Patrimonial Sustainable is a compartment of Econopolis Funds SICAV, a UCITS fund under Luxembourg law. The fund aims to deliver a long term return to investors via investments in equity, bonds, and monetary instruments, without geographical restrictions and without restrictions concerning sector or currency allocation. The fund is aimed at investors with an investment horizon of more than 5 years. SFDR classification: Article 8 Compartment.

Managers' comments

Within the equity component, the focus was on a strategic rotation from last year's technology winners towards cyclical names with catch-up potential. The position in Meta Platforms was fully divested. The released capital was partly redeployed into Keyence, the Japanese market leader in sensors and factory automation, which the managers believe is ideally positioned to benefit from a recovery in global industrial production. In addition, exposure to analogue semiconductors was increased. Within the bond component, the managers actively sought additional yield and purchased corporate bonds issued by Bekaert. In the higher-risk segment, a switch was made from Turkcell to Colombia (in euros), based on the relative valuation of the two issuers.

Risk Indicator

The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 3 out of 7, which is a medium-low risk class.

This classifies potential losses due to future performance at a medium-low level and poor market conditions are unlikely to affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you receive depends on the exchange rate between the two currencies. This risk is not taken into account in the indicator above.

The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance, so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Investment objectives

The sub-fund's objective is to provide long-term capital gains to its shareholders. This objective will be pursued by investing the sub-fund's assets in equities and fixed-income instruments, as well as cash or other monetary instruments, without geographical limitation and without sector or currency restrictions. The sub-fund may invest in bonds or other corporate or government debt instruments, including, inter alia, certificates of deposit with a maturity of more than 3 months, which must be predominantly investment grade and in equities (in which the sub-fund may invest up to 60% of its net assets), the selection of which will be based on economic and market conditions and the expectations and strategic views of the Investment Manager. There are no restrictions or limitations regarding currencies, geographical regions or other specific economic or industrial sectors or niches. For the purpose of implementing its main investment policy or to place its liquid assets, the sub-fund may also invest in T-Bills, certificates of deposit, commercial paper and time deposits up to a total of 49%. Additionally, the sub-fund may place up to 20% of its assets in cash deposits at sight. Subject to legal restrictions, the sub-fund may invest in derivative financial products, such as futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, to achieve its investment objectives and to hedge risks. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.
