

Fund manager:

Michaël De Man

Co-manager:

Maxim Gilis

Description of the fund

Econopolis EM Government bonds is a compartment of Econopolis Funds Sicav, a Luxemburg UCITS fund. The fund aims to deliver a long term return to investors via investments in government bonds in emerging markets. It is an actively managed fund that makes clear choices in which countries it invests and in which countries is does not invest. SFDR classification: Article 8 Compartment.

Comments of the portfolio manager:

Emerging market bonds continued their positive trend from 2025 in the first month of 2026. The sub-fund rose by +0.9% over the past month. This was primarily due to strong returns in local Latin American bonds (Brazil, Mexico, Colombia, and Chile) and the euro segment (including Romania). The managers further expanded exposure to local currencies through additional purchases of the Chinese renminbi, Malaysian ringgit, and the South African rand. In the euro segment, an optimization was carried out by swapping an existing 10-year Mexican euro bond for a new issue with the same maturity. This switch offered an additional yield of nearly 25 basis points per year. In Macedonia, maturities were extended. In the dollar segment, a seven-year corporate bond from the Japanese technology investment group Softbank was purchased at an annual interest rate of approximately 7%.

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk may vary significantly if you redeem the product early and you may get back less. The summarised risk indicator is a guide to the risk level of this product compared to other products. It shows how likely the product is to lose money due to movements in the markets or because we are unable to pay you out. We have classified this product as 3 out of 7, which is a medium-low risk class. This classifies potential losses due to future performance at a medium-low level and poor market conditions are unlikely to affect our ability to pay you out. Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you receive depends on the exchange rate between the two currencies. This risk is not taken into account in the indicator above. The sub-fund is also exposed to the following materially relevant risks not included in the summary risk indicator: Other risk factors may exist. This product does not protect against future market performance. so you may lose all or part of your investment. If we are unable to pay you what you owe, you may lose your entire investment.

Investment objectives:

The sub-fund's objective is to provide long-term capital gains to its shareholders. This objective will be pursued by investing the sub-fund's assets in fixed income instruments, cash or cash equivalents and without geographical limitation. At least 51% of the sub-fund's assets will be invested in emerging economies with no sector or currency restrictions. The sub-fund aims to generate returns from current income and capital appreciation by investing in fixed income securities actively selected by the Investment Manager. The selection will mainly (i.e. at least 90% of the bond portfolio) relate to instruments issued by governments, government agencies, supranational institutions and/or government-guaranteed issues. The sub-fund may invest to a limited extent (i.e. no more than 10% of the bond portfolio) in fixed income instruments issued by corporate entities or other private sector entities that do not benefit from an explicit government guarantee. The sub-fund may invest in fixed-income securities issued in local currencies of emerging countries or in fixed-income securities issued in currencies of non-emerging countries, without any limitation. The sub-fund's neutral investment universe is a combination of 30% hard currency EM bonds and 70% local currency EM bonds. 70% EM bonds in local currency. The maximum weight per issuing country is limited to 15% of the sub-fund's net assets.

The sub-fund is actively managed and will invest in securities on the basis of macroeconomic analysis, analysis of specific issuers, political analysis, valuations and/or other considerations deemed appropriate by the investment manager. At least half of the bond portfolio will be invested in investment grade credits at the time of purchase of the relevant fixed income instruments. The rating will be determined based on the highest rating from one of the three major rating agencies. If the bonds are not rated, the issuer's own rating will be used, if available. Additionally, the sub-fund may hold cash sight deposits of up to 20% of its assets. Subject to legal restrictions, the sub-fund may invest in derivative financial products, such as futures, options, forward foreign exchange contracts, credit default swaps or interest rate swaps, with a view to achieving its investment objectives and hedging risk. The sub-fund promotes environmental or social characteristics. This sub-fund is subject to a sustainable investment policy, which can be accessed at <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the fund's prospectus. Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.
