Sector breakdown of equities

Manager's commentary

The managers took profit on argenx, following the sharp price rise that came after the positive phase 3 results of the ALKIVIA study of Vyvgart in myositis, announced in mid-August. The freed-up funds were used, among other things, to add to UCB on weakness; the share had fallen back after the half-year results, while the commercial momentum of Bimzelx and the raised peak-sales expectation underpin the structural story. In addition, the managers built exposure to the recovery in automotive semiconductors. They took new positions in Melexis, which was able to present a supply agreement with Chinese electric-vehicle maker BYD, and in its important manufacturing partner X-FAB. The position in Elia Group was expanded, supported by the investment needs in the electricity grid. The managers divested KBC. The holdings in Kinepolis and Fagron were scaled back. In this way, the compartment remains strongly anchored in Belgian quality companies with a clear growth story.

Risk

For the risk indicator, it is assumed that you hold the product for 5 years. The actual risk may vary significantly if you sell at an early stage, and you may receive back less. The summary risk indicator is a guideline for the level of risk of this product compared with other products. The indicator shows how likely it is that investors may incur losses on the product due to market developments or because no funds are available to make payments. We have classified this product as class 4 out of 7; this is a medium-risk category. This means that the potential losses on future performance are estimated as moderate, and that there is a possibility that we may not be able to pay you due to adverse market conditions. Be aware of the currency risk. You may receive payments in a currency other than the reference currency, so the final return you receive will depend on the exchange rate between the two currencies. This risk is not included in the indicator above. The compartment is also exposed to the following materially relevant risks that are not included in the risk indicator/ other risk factors may exist. Because this product is not protected against future market performance, you could lose all or part of your investment. If we are unable to pay you what you are owed, you could lose your entire investment. Please refer to the Product's prospectus for more information on the risks.

Sustainability

This compartment applies a responsible investment policy based on four strategies : negative screening^o, norms-based screening^o, ESG integration^o, and a best-in-universe approach in which only companies with strong ESG scores are selected. In addition, companies involved in controversial activities such as weapons production, tobacco, and harmful oil and gas extraction are excluded. This compartment also actively uses its voting rights to promote sustainability and good governance. To learn more about this, you can consult the sustainable investment policy of this compartment via the following link. If you wish to invest in this compartment, all of its sustainable characteristics and objectives must be taken into account.

Investment policy

The objective of the sub-fund is to provide investors, through an actively managed portfolio, with long-term capital appreciation on their investment. This objective will be pursued by investing the sub-fund's assets mainly in shares and other equity-like securities with a geographic focus on Belgium. This Belgian geographic focus is achieved if at least one of the following criteria is met : (i) constituents of the Euronext BEL All-Share (BAS) index, (ii) companies whose headquarters or legal domicile are in Belgium, and (iii) Belgian companies listed outside Belgium. The sub-fund may invest in shares and other equity-like securities selected based on ongoing financial assessments, analyses of the macroeconomic environment, and the specific profile of the issuer. There are no restrictions regarding currencies or specific economic or industrial sectors. The investment manager's decisions are discretionary in nature and reflect his expectations and strategic insight. The investment policy of the sub-fund is based on an integrated approach in which valuation, quality and sustainability are key elements for stock selection. The manager conducts the selection in a disciplined manner, taking into account internal and external research reports, and develops internal valuation models that help determine whether a stock offers potential. In addition, the manager also relies on internal and external sources of sustainability analysis. The sub-fund may additionally hold up to 20% of its assets in immediately callable cash deposits. The sub-fund may, within legal limits, invest in financial derivative instruments such as futures, options, currency forward contracts, credit default swaps or interest rate swaps to achieve its investment objectives and to hedge risks. The sub-fund promotes environmental or social characteristics. A sustainable investment policy applies to this sub-fund and can be consulted at <https://www.econopolis.be/en/sustainability>. Further sustainability-related information is available in the fund's prospectus. Reference benchmark : The portfolio is actively managed on a discretionary basis without reference to a benchmark. Subscription and redemption : Daily. Contact your distributor for cut-off time.

Fiscal regulation

Withholding tax on dividends* : 30.% (only applicable to DIS)
 Stock exchange tax on sales* : 1.32% (max. €4.000) (only applicable to CAP)
 Stock exchange tax on conversions* : CAP -> DIS : 1.32% (max. €4.000); DIS -> CAP : 0%.
 Capital gains tax on financial assets* : 10% on capital gains realised since 01/01/2026, with an annual exemption of €10.000/person (indexed, accruable up to €15.000); historical capital gains up to and including 31/12/2025 are exempt. The investor must take the necessary steps themselves. *applicable to a natural person resident in Belgium

Technical terms°

Actuarial return	The annual return that an investor can expect from an investment over a given period, taking into account the reinvestment of intermediate income such as coupons or dividends.
Management fee	The annual fee charged by the fund manager for managing the sub-fund.
Fundsquare	An online platform where financial information about funds and their Net Asset Values (NAV) is published.
SFDR classification	Sustainable Finance Disclosure Regulation. This classification indicates the extent to which a fund integrates sustainability criteria into its investment strategy.
NAV (Net Asset Value)	Unit value of the internal investment compartment (e.g., on the stated date and in the currency of the internal fund).
Number of positions	The total number of securities from the above asset class in the compartment.
Negative screening	Exclusion of companies through, among other things, the Norwegian exclusion list.
Norms-based screening	The investment process in which companies are screened for compliance with international standards, such as those of the United Nations, and potentially excluded if they violate these standards.
ESG integration	his is the strategy of integrating Environmental, Social, and Governance (ESG) criteria into the investment process.
Month To Date	Shows the return or performance from the beginning of the current month up to the most recent valuation date (see 'Data as of' below).
Year To Date	Shows the cumulative return or performance from the beginning of the calendar year up to the most recent valuation date (see 'Data as of' below).
Consumer staples	Products that people continue to buy regardless of economic conditions, such as food, beverages, and personal care items. These are basic necessities and therefore show little fluctuation in demand.
Consumer discretionary	Products for which demand is highly dependent on the economic cycle, such as cars, travel, and luxury goods. During periods of economic growth, demand increases, while it often declines during recessions.
Emerging markets	This refers to the financial market of a country that has so far lagged in economic development but whose prospects are promising.
Raw materials	Companies active in the extraction and processing of basic materials such as metals, mining, chemicals, and forestry products.
