9	SS&C Technologies Holdings	1.74	USD
10	BlackRock	1.68	USD

Number of positions^o : 84

Sector breakdown of equities

Manager's commentary

In August, the managers took a new position in Insmid, a biopharmaceutical company that is commercialising its first-in-class medicine for non-cystic-fibrosis bronchiectasis, a chronic lung disease for which no treatment existed until recently and which has a large, under-treated patient population. The position fits the theme of population ageing and rising demand for care that characterises the compartment. Exposure to BB Biotech was also increased, strengthening the biotechnology component of the selection. In addition, the managers carried out a limited reshuffle, in which several consumer and industrial names such as Marriott, Adidas, Danone and Waste Management were slightly scaled back. The core of the compartment remains anchored in structural beneficiaries of demographic shifts, with Eli Lilly as the largest position.

Risk

For the risk indicator, it is assumed that you hold the product for 5 years. The actual risk can vary considerably if you sell the product early, which may result in you getting back less. The summary risk indicator is a guide to the level of risk of this product compared with other products. It indicates how likely investors are to suffer losses as a result of market developments or because we are unable to make payment. This product is classified in risk class 3 on a scale of 7, which corresponds to a medium level of risk. This means that potential losses as a result of future performance are assessed as medium and that adverse market conditions may negatively affect our ability to pay you. **You should take currency risk into account.** You may receive payments in a currency different from your reference currency, so the final return will depend on the exchange rate between those currencies. This risk is not included in the risk indicator above. The compartment is also exposed to other materially relevant risks that are not included in the summary risk indicator. Other risk factors may exist. This product offers no protection against future market performance, so you may lose all or part of your investment. If we are unable to pay you the amount due, you may lose your entire investment. Further information for investors is available here.

Sustainability

This compartment applies a responsible investment policy based on four strategies : negative screening°, norms-based screening°, ESG integration°, and a best-in-universe approach in which only companies with strong ESG scores are selected. In addition, companies involved in controversial activities such as weapons production, tobacco and harmful oil and gas extraction are excluded. This compartment also actively uses its voting rights to promote sustainability and good governance. To learn more about this, you can consult this compartment's sustainable investment policy via link. If you wish to invest in this compartment, all of its sustainable characteristics and objectives must be taken into account.

Investment policy

The objective of the sub-fund is to offer investors, through an actively managed portfolio, long-term capital gains on their investment. The sub-fund invests in shares and other equity-type securities of companies active in developed markets (such as, but not limited to, Europe, the United States and Japan) and may also invest up to a maximum of 49% in companies active in emerging markets (such as South Korea, Taiwan, Hong Kong, China, India, Brazil, Mexico, South Africa and Indonesia). The sub-fund may invest directly in China A-shares listed on the markets of the People's Republic of China via China Connect. The sub-fund may invest in shares and other equity-type securities selected on the basis of ongoing financial assessments, analysis of the macroeconomic environment and the issuer's specific profile, future developments, etc. The sub-fund must hold at least 90% of its net assets in shares. The sub-fund will invest mainly in equity-type securities of companies that can benefit from demographic changes, including, but not limited to, the following sub-themes : healthcare, sport and exercise, sustainable food, consumers in emerging markets, urbanisation, leisure, changing consumer habits, medical innovations, wealth transfer and automation. There are no limitations or restrictions with regard to currencies, geographical regions or other specific economic or industrial sectors or niches. The sub-fund's investment policy is based on three cornerstones in security selection : a disciplined step-by-step approach in the Investment Manager's research and analysis, a unique non-benchmark philosophy and the importance of field research. The sub-fund may invest in derivative financial instruments, such as futures, options and forward foreign exchange contracts, in order to achieve its investment objectives and hedge risks. The sub-fund promotes environmental or social characteristics. A sustainable investment policy applies to this sub-fund and can be consulted at <https://www.econopolis.be/en/fondsen/fondsendocumentatie/link>. Additional information on sustainability is available in the fund prospectus. Reference benchmark : The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Fiscal regulation

Withholding tax on dividends* : 30.% (only applicable to DIS)

Stock exchange tax on sales* : 1.32% (max. €4.000) (only applicable to CAP)

Stock exchange tax on conversions* : CAP -> DIS : 1.32% (max. €4.000); DIS -> CAP : 0%.

Capital gains tax on financial assets* : 10% on capital gains realised since 01/01/2026, with an annual exemption of €10.000/person (indexed, accruable up to €15.000); historical capital gains up to and including 31/12/2025 are exempt. The investor must take the necessary steps themselves. *applicable to a natural person resident in Belgium

Warning

The compartment has been approved for distribution only in Belgium and Luxembourg. The prospectus and the Key Information Document (KID) are available on the website www.fundsquare.net/homepage, where the net asset value is also published. This document is a general document intended for a wide audience and was not prepared on the basis of information about the reader's personal situation. No assessment was made of the reader's knowledge and experience, nor of their financial situation or investment objectives. The financial instruments mentioned in this document may therefore not be appropriate or suitable for the reader. This document therefore contains product information only about the financial instruments mentioned therein and cannot be considered investment advice. The appointed management company of the UCITS is of Luxembourg nationality. The management company may stop marketing the compartment in Belgium. Investors may obtain a summary of investor rights (available in Dutch, French, and English) on this webpage.

Commercial document : This is an advertisement. Please consult the prospectus of the UCITS and the key information document before making an investment decision.

Technical terms[°]

Actuarial return	The annual return that an investor can expect from an investment over a given period, taking into account the reinvestment of intermediate income such as coupons or dividends.
Management fee	The annual fee charged by the fund manager for managing the sub-fund.
Fundsquare	An online platform where financial information about funds and their Net Asset Values (NAV) is published.
SFDR classification	Sustainable Finance Disclosure Regulation. This classification indicates the extent to which a fund integrates sustainability criteria into its investment strategy.
NAV (Net Asset Value)	Unit value of the internal investment compartment (e.g., on the stated date and in the currency of the internal fund).
Number of positions	The total number of securities from the above asset class in the compartment.
Negative screening	Exclusion of companies through, among other things, the Norwegian exclusion list.
Norms-based screening	The investment process in which companies are screened for compliance with international standards, such as those of the United Nations, and potentially excluded if they violate these standards.
ESG integration	his is the strategy of integrating Environmental, Social, and Governance (ESG) criteria into the investment process.
Month To Date	Shows the return or performance from the beginning of the current month up to the most recent valuation date (see 'Data as of' below).
Year To Date	Shows the cumulative return or performance from the beginning of the calendar year up to the most recent valuation date (see 'Data as of' below).
Consumer staples	Products that people continue to buy regardless of economic conditions, such as food, beverages, and personal care items. These are basic necessities and therefore show little fluctuation in demand.
Consumer discretionary	Products for which demand is highly dependent on the economic cycle, such as cars, travel, and luxury goods. During periods of economic growth, demand increases, while it often declines during recessions.
Emerging markets	This refers to the financial market of a country that has so far lagged in economic development but whose prospects are promising.
